Installing SAP Crystal Reports Viewer 2011

1.1 To download the installation program

1. Go to <https://service.sap.com/bosap-support> > **Software Downloads**.
2. On the "Find your software" tab, under the "A–Z Index", select **Installations and Upgrades**.
3. Select **C > CRYSTAL REPORTS VIEWER > CRYSTAL REPORTS VIEWER 2011**.
4. Select **Installation and Upgrade**.
5. Select the object titled "SAP CRYSTAL REPORTS VIEWER 2011 <version> <platform> (32B)", then follow the instructions on the website to download and extract the objects.

Note:

The software may take a long time to download, and you may need to contact the system administrator to ensure your company's firewall will not terminate the download process.

1.2 Installation overview

On a Microsoft Windows platform, the SAP Crystal Reports Viewer 2011 Installation Wizard works with Microsoft Windows Installer to guide you through the installation process.

Note:

- If you cancel your SAP Crystal Reports Viewer 2011 upgrade on a Microsoft Windows machine, you may not be able to run the upgrade again on that machine. Refer to the release notes for the workaround.
- Installing SAP Crystal Reports Viewer 2011 side-by-side with another version of the Crystal Reports viewer is not supported.
- Although Crystal Reports Viewer is supported on 64-bit operating systems, it is only available as a 32-bit application. When installing a database driver for Crystal Reports Viewer on 64-bit operating systems, ensure that you install the 32-bit version. A 32-bit application cannot use a 64-bit driver.

For information about installation requirements, see the *Supported Platforms* document available on the SAP BusinessObjects Enterprise support site: <http://www.sdn.sap.com/irj/boc/articles>

1.3 Installing SAP Crystal Reports Viewer 2011 on Windows

You have two options to install Crystal Reports Viewer on a Windows platform: the installation program or the silent mode.

If you already have a version of Crystal Reports Viewer installed, you will be prompted to do one of the following options depending on what version is installed:

- Older version such as Crystal Reports Viewer 2008
You will be prompted to upgrade to the newest version.
- Another version of SAP Crystal Reports Viewer 2011
You will be prompted to repair or remove the installed version.

1.3.1 To install SAP Crystal Reports Viewer 2011 on Windows using the installation program

1. Locate the installation program. If you are installing from a physical media, look for `setup.exe` in the top-level folder. If you are installing from a compressed download, extract it and locate `setup.exe`.

Note:

Depending on your system configuration, a dialog box may appear, informing you to update existing files. If this happens, click **Yes** and restart your machine. The Installation Wizard updates the required files.

2. Run `setup.exe` by double-clicking it in Windows Explorer or calling it from the command-line.
3. Choose a language for the setup program to use during the installation process.
4. When the "Welcome" dialog box appears, click **Next**.
5. In the "Choose Language Packs" dialog box, select the languages that you want to install and click **Next**.

Note:

You cannot install additional language packs after you have installed the software. If you need additional language support, you must uninstall the product and reinstall it with the required language packs.

The "Start Installation" dialog box appears.

6. Click **Next**.
The installation process begins.
7. Click **Finish** to complete the installation.

1.3.2 Running a silent installation

A silent installation is one that you can run either from the command line, or by using a response file to automatically install Crystal Reports Viewer on any machine in your system, without the installation program prompting for information during the installation.

The silent installation for Crystal Reports Viewer is particularly useful when you need to do multiple installations and do not want to interrupt people who are working on machines in your system. You can also add the silent installation command in your own installation scripts.

Note:

- The silent installation is not available from the Crystal Reports Viewer setup program and is intended only for experienced administrators of Crystal Reports Viewer.
- When you perform a silent installation, you accept the Crystal Reports Viewer end-user license agreement by default. You can find a copy of the license agreement in the `Docs` folder of your product distribution. Silent installations are intended for new installations; do not use them for upgrades.

1.3.2.1 Command line silent installation

The silent installation command consists of the command `setup.exe`, followed by a number of parameters that provide information about the installation. There are several valid parameters that you can use, but it is good practice to keep the silent installation as simple as possible.

Example: Sample command line silent installation

The following example creates a sub-directory `\SAP Crystal Reports Viewer 2011` and installs Crystal Reports viewer into it.

```
setup.exe -q setupuilanguage=en installdir="C:\Program Files\SAP BusinessObjects\" selectedlan  
guagepacks="en;ja;de"  
installtype=Default  
startupshortcut=1 preloadreportfilepath="C:\Program Files\My folder\My Report.rpt"
```

A silent installation log file is created in the `%TEMP%` folder to capture all placeholder DLL errors. If the installation is successful, it is copied to the logging folder. If the installation fails for any reason, the installation log file remains in the `%TEMP%` folder.

1.3.2.1.1 Command line parameters

The following table lists the most common parameters used in a command-line silent installation. To use a parameter, place it on the command line after the `setup.exe` command.

Note:

Parameters that are not listed in this table may be available, but they have not been tested. Untested parameters are not supported.

Parameter	Description	Example
setupuilanguage	The language that you want to use during the installation. You can select only one language. The languages are listed in a separate table.	setupuilanguage=en
installdir	The SAP BusinessObjects installation path. Note: If you have already installed an SAP BusinessObjects product, the desktop client will be installed into the default <INSTALLDIR> directory.	installdir="C:\Program Files\SAP BusinessObjects\"
selectedlanguagepacks	The language packs that you want to install. You can select more than one language. The languages are listed in a separate table. Note: Separate language packs with a semicolon (;).	selectedlanguagepacks=en;ja
installtype	The type of installation: • Default installs all components automatically.	installtype=Default
-q	Performs a "quiet" or background install; no prompts are displayed.	
-r	Runs the install from a previously created response.ini file.	setup.exe -r C:\response.ini
-w	Creates a response.ini file and writes it to the specified destination.	setup.exe -w C:\response.ini

Language parameters

These values are used for both the setup and for installing language packs:

Language value	Description
en	English
fr	French
de	German
ja	Japanese
es	Spanish
zh_CN	Simplified Chinese
it	Italian
nl	Dutch
ru	Russian
ko	Korean
zh_TW	Traditional Chinese
pt	Portuguese
sv	Swedish
pl	Polish
nb	Norwegian Bokmal
da	Danish
th	Thai
fi	Finnish
cs	Czech
hu	Hungarian
sk	Slovakian
tr	Turkish

1.3.2.2 Response file silent installation

During an installation, you can optionally indicate that you want the installation program to create an INI file to act as a response file for subsequent installations. The installation program then records the installation options that you select as you install Crystal Reports Viewer, and saves the file to your machine.

The created INI file can be read by the installation program to silently install Crystal Reports Viewer with the same options specified during the creation of the file. This is helpful for quickly producing a silent installation of Crystal Reports Viewer.

Note:

The INI response file that is created during an installation must be included with the installation files.

1.3.2.2.1 To create a response file for a silent installation

Before you run a response file silent installation, with the Crystal Reports Viewer 2011 media follow these steps to create a `response.ini` file.

1. Run `setup.exe -w C:\response.ini` from the installation media.
The interactive installation wizard appears.
2. Proceed through the wizard, selecting your installation options. Follow the instructions in the "Installing SAP Crystal Reports Viewer 2011 on Windows" section.
3. On the "Start installation" page, click **Next**, and then click **OK**.

The installation program writes your installation options to the `response.ini` file, and closes.

You can now open `response.ini` in a text editor to review your installation options.

Note:

When creating a response file with the GUI installation program, the license key and any passwords entered via the GUI are not written to the response file in plain text format. You must replace the starred entries (*****) with your license key or passwords before performing a silent installation.

Example:

In this example, the selected installation options include English and Japanese language packs, and the English installation language.

```
### Installation directory
installldir=<INSTALLDIR>

### Language Packs Selected to Install
selectedlanguagepacks=en;ja

### Setup UI language
setupuilanguage=en

features=CrystalReportsViewerRoot
```

Note:

If you want to add a note or comment to the `response.ini` file, you can add `###` to the beginning of a line. Lines that begin with `###` are not processed by `setup.exe`

1.3.2.2 To run a response file installation

You can change the values in the response file before you run it. Open the response.ini file and change the values. For more information, refer to the parameter table in the Command Line silent installation instructions.

1. Click **Start > Run** and type cmd to open the "Command Prompt" window.
2. In the "Command Prompt" window, type cd <Installer Path>.
3. Run `setup.exe -r <response file path>\response.ini`

The installation program runs.

1.3.3 Maintaining or uninstalling Crystal Reports Viewer on Windows

Use "Add or Remove Programs" and select one of the following options to maintain or uninstall Crystal Reports Viewer:

Option	Description
"Repair"	This option lets you repair or fix the Crystal Reports Viewer installation program.
"Remove"	This option lets you remove the Crystal Reports Viewer installation program.

1.3.3.1 To repair SAP Crystal Reports Viewer 2011

1. Click **Start > Settings > Control Panel**.
The "Control Panel" window opens.
2. Double-click **Add or Remove Programs**.
The "Add or Remove Programs" dialog box opens.
3. Select **Crystal Reports Viewer 2011** and click **Change/Remove**.
The "Crystal Reports Viewer 2011 Setup" dialog box appears.
4. Click **Repair** and then click **Next**.
The repair process begins.
5. When the process is complete, click **Finish**.

The Crystal Reports Viewer application has been repaired, and you are returned to the "Add or Remove Programs" dialog box.

1.3.3.2 To uninstall SAP Crystal Reports Viewer 2011 on Windows

1. Click **Start > Settings > Control Panel**.
The "Control Panel" window opens.
2. Double-click **Add or Remove Programs**.
The "Add or Remove Programs" dialog box opens.
3. Select Crystal Reports Viewer, and click **Change/Remove**.
The "Crystal Reports Viewer 2011 Setup" dialog box appears.
4. Click **Remove** and then click **Next**.
The "Uninstall Confirmation" dialog box appears.
5. Click **Next**.
Wait while files are removed and the necessary configuration is done.
6. Click **Finish**.

The Crystal Reports Viewer application has been uninstalled, and you are returned to the "Add or Remove Programs" dialog box.

1.4 Installing or upgrading SAP Crystal Reports Viewer 2011 on a Mac

If you already have a version of Crystal Reports Viewer installed on your Mac, you must uninstall it before you can upgrade to a newer version.

1.4.1 To install SAP Crystal Reports Viewer 2011 on a Mac

1. Browse to the location where you downloaded `Crystal Reports Viewer 2011.dmg`.
2. Double-click `Crystal Reports Viewer2011.dmg`.

A dialog box displays the progress of the disk image mounting. After mounting is complete, the contents of the disk image are automatically displayed.

Note:

This step is unnecessary if you downloaded `Crystal Reports Viewer 2011.dmg` from the web; in this scenario, the disk image automatically mounts.

3. Select the **Crystal Reports Viewer 2011** icon and drag it to the adjacent folder called "Applications". A copy-progress dialog box appears. Once copying is complete, the Applications directory is displayed. The Crystal Reports Viewer application is now present with the other applications.
4. To open the viewer, double-click the **Crystal Reports Viewer 2011** icon in the Applications folder. A loading banner for the viewer appears.
5. Accept the User License Agreement.

Note:

This step is necessary only the first time you run Crystal Reports Viewer. If you do not accept the license agreement, you cannot use the viewer.

Crystal Reports Viewer opens.

1.4.2 To uninstall SAP Crystal Reports Viewer 2011 on a Mac

1. Using the **Finder**, delete SAP Crystal Reports Viewer 2011 from the "Applications" folder.
2. Click **Applications > Utilities > Terminal**.
3. Type in the command to go to your home directory: `cd ~`.
4. Delete the hidden `.crv2011` folder by typing the command: `rm -rf .crv2011`.
5. Exit the terminal.
