

1.1. SSO Deactivation

Field Name	Value	Description
	12345	

Explanation	Screenshot
(1) Click Single Sign-On (SSO) Settings .	
(1) Click in the field and delete the value.	
(1) The Reset Token field is cleared.	

Explanation	Screenshot
<p>(1) Click </p>	
<p>(1) Click  This will disable the SSO</p>	
<p>(1) To reactivate SSO for SAML, we just need to enter a value in the Field here. Any value is fine, for example here we enter 12345.</p>	
<p>(1) The field is filled out.</p>	

Explanation	Screenshot
<p>(1) Click </p>	
<p>Now SSO is on again. You can see this by the text stating: "Token-based login is On"</p>
