To enable the workflow derivation rules and event reason derivation rules in provisioning you need ensure the appropriate checkboxes are checked in company settings.

To enable workflow derivation:

- 1. Login into Provisioning and find the customer's instance
- 2. Click "Company Settings"
- 3 Either scroll down or search (Ctrl-F) until you find "Employee Central V2 (i.e. Event Reason Derivation..." then check the checkbox
- 4. Click the "Save" button further up in the same section you are editing; enter the company instance ID then "confirm"
