

## 1.1. SSO Deactivation

| Field Name | Value | Description |
|------------|-------|-------------|
|            |       |             |
|            | 12345 |             |

| Explanation                                      | Screenshot                                                                           |
|--------------------------------------------------|--------------------------------------------------------------------------------------|
| (1) Click <u>Single Sign-On (SSO) Settings</u> . |    |
| (1) Click in the field and delete the value.     |   |
| (1) The <b>Reset Token</b> field is cleared.     |  |

| Explanation                                                                                                                                     | Screenshot                                                                           |
|-------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <p>(1) Click </p>                                              |    |
| <p>(1) Click </p> <p>This will disable the SSO</p>             |    |
| <p>(1) To reactivate SSO for SAML, we just need to enter a value in the Field here.<br/>Any value is fine, for example here we enter 12345.</p> |   |
| <p>(1) The field is filled out.</p>                                                                                                             |  |

| Explanation                                                                                        | Screenshot                                                                          |
|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| <p>(1) Click </p> |   |
| <p>Now SSO is on again. You can see this by the text stating: "Token-based login is On"</p>        |  |
